SPECIAL AIR SERVICE ASSAULTER HEADSET

COMMUNICATIONS > SITUATIONAL AWARENESS > DURABILITY > FLEXIBILITY: SAS

In 1998, TCI designed and introduced the Special Air Service Headset System (SAS) to a world-renowned Special Air Service unit.

As a result, SAS was determined to be exceptionally durable system with performance was rated an exceptional.

The SAS is a full-featured, progressive tactical headset system that was designed to meet the needs of special operation teams, as well as well as your team. It is currently being used by thousands of law enforcement and military units around the world.

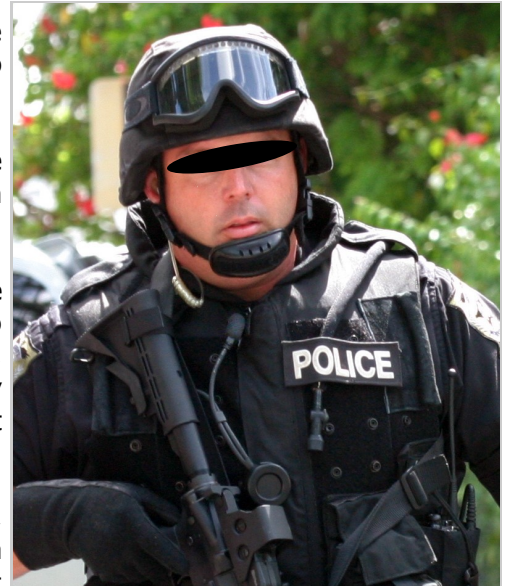

For customers looking for high performance, versatility and a low-profile system, SAS is a solid choice. SAS is one of the most versatile tactical headset systems made today and is a popular choice for those operators seeking a versatile headset that is suitable for active tactical applications. The SAS can also be concealed under clothing and double as a reliable covert communication system without adaptation.

Many teams are involved in a wide variety of operations, ranging from high-risk entries to surveillances and SAS is an exceptional choice for these units. With the SAS, you get the durability required for high-risk activities and have the capability to use the same SAS system during lower-profile operations.

The SAS features our TCI Tactical Push-To-Talk switch, PRO-Series Coiled Audio Tube, comfortable/multi-sized TACT-LITE Earmold Kit, and a Waterproof/Noise-Canceling Microphone. The radio connection for your specific model and system storage bag are also included.

Developed for the rigors of military and law-enforcement special operations, the SAS headset has proven itself with thousands operators around the globe. Long-range comfort, extreme durability and exceptional performance make the SAS a popular choice - even when gas masks are deployed. It is compatible with practically any helmet, hat, cap or balaclava and can be fitted for operators of all shapes and sizes. The SAS does not interfere with weapon positioning or peripheral hearing. Many radio connectors options available!
